

MARCO ALDANA

FULL-STACK SOFTWARE DEVELOPER

GUADALAJARA, JALISCO
(+52) 3318386778
MARCO.ALDANA.D@GMAIL.COM

Hi! I'm a full-stack software developer, focused on .Net Core and Javascript technologies.

I consider myself an Innovative, enthusiastic, and determined person who really loves challenges. I really like the continuous learning and improving the scalability, readability, and performance of the code I participate in.

EXPERIENCE

Software Developer — *3 Pillar Global*

AUGUST 2021 - PRESENT

- Update and add new functionalities from a Legacy bank application written in ASPX and ASP.Net Framework to ASP.Net Core, working in a scrum team and developing API restful services and unit testing.
- Participate in Python, .Net Core and React training programs and projects.

EIS Engineer — *Tata Consultancy Services*

FEBRUARY 2020 - AUGUST 2021

- Provide IT Support to manage medical prosthetics data.
- Write documentation using excel and VB.
- Participate in Java training program.

Test Engineering Technician — *JABIL*

JANUARY 2017 - JULY 2019

- Personnel management.
- Diagnosis, maintenance, repair and updates of test equipment.
- Administrative tasks for handling and documentation of equipment.
- Develop and maintain applications made in 'Jabil Test' Framework.
- Develop a .Net Desktop application for searching all project documentation.
- Analysis and implementation of Kaizen improvements related to the measurement systems, and direct support to the control of these.

INTERESTS

Software development, apart from my work, is one of my biggest hobbies. I really like searching for new technologies or improving the ones I know.

I also enjoy music. On some free times I like to make it, playing guitar or using a PC program connected to a MIDI keyboard.

Sometimes I like to play video games, go to the movies or go for a walk with friends.
